Arthur Dent

Gini

Paperwork is monstrous, let's fight it together: Let's do some magic!

Here's the deal: Our business model requires people to be dependent on paper. We do not actually want paper to go away. We are not actually fighting paper work, we're just making it easier to deal with. Which is cool, but our motto does not make any sense. Also, Google pretty much started doing the exact same thing with Google Lens.

But, whatever.

Oh and also we want to enhance our magic with some spicy machine learning.
